Forecast for Saturday 29 Oct 2022

Weather: Mainly dry overnight but some mist around the hills despite the fresh breeze. By dawn it will be cloudy with some mist lingering. Light rain will move across the area from the southwest early in the morning period, the rain will start quite light and will be drizzly in some places. Perhaps some of the eastern areas towards Sheffield will remain mostly dry. Rain will turn heavier by mid morning but again the eastern areas of the Peak District are likely to fair best. Becoming drier in the evening but still quite cloudy and dull with a few showers around.

Chance of cloud-free hill tops above 600m: 70% falling to 20% in the afternoon as frontal rain spreads north.

Low cloud and visibility: The hill tops in the northeast will mostly be clear on Saturday morning but in the west towards Macclesfield patches of lower cloud will soon shroud the tops and cloud will become more extensive during the morning becoming broken above 400m by the afternoon. In the north cloud will be more scattered above 500m. Visibility will be poor or very poor in any early mist and fog otherwise it will be moderate. During the drizzle and rain visibility will again be moderate or poor. Navigation around the Peak District may become tricky at times.
